

EVOLVE[®]

HDO mini

EN

Performance

Receives local DVB-T2 digital television signals

Built-in high gain and low noise amplifier for best UHF signals reception

Scientifically designed array improves reception for digital signals

Signal clear technology with extremely low noise circuitry

To be powered by included AC/DC adaptor

Can be mast mounted or balcony mounted

Adjustable wide reception angle

Waterproof and UV resistant housing

Frequency Range:

UHF : 470-790MHz

Gain: Max 20dBi

Connector: F connector female

Impedance: 75Ω

Input voltage: AC230-240V

Working Voltage: DC5V 550A, 2.75W

Notice

Stop using during thunderstorms and turn off the power.

Turn off the power when not in use.

If it can't receive well, place the antenna in a different position.

Installation Manual

1. Installation for U-bolt

Insert the U-bolt into the hole of antenna bracket and then install the clamp in the U-bolt.

2. Install to the mast

Place U-bolt through the mast, adjust the antenna bracket and fasten screws.

3. Cable connection

Connect the signal cable to the signal output jack of the antenna and then fix the waterproof cap covering the connections to avoid water filtration.

4. Adjustment on Receiving Directions

Adjust the antenna direction until you get the good signal for clear picture.

5. Connection and Usage

Connect the signal cable from the antenna to the signal input Jack of the power supply, connect the power supply output jack to the TV, plug the power adaptor with the power supply and connect to power socket.

Connect the signal cable from the antenna to the signal input jack of the power supply, connect the power supply output jack to the digital receiver, plug the power adaptor with the power supply and connect to power socket, and finally join the TV and the digital receiver.

Position
